I enclose drawings Nos. DXA.35748 and DXA.35749, showing alternative mounting arrangements for [ ] tape punch on stereo comparator digitiser.

STAT

STATINTL

The arrangements shown on DXA.35748 is, as requested by your customer, with the tape reel external but this has involved some complications which require to be drilled in the reel for mounting. The alternative arrangement in DXA.35749 leaves the [ ] equipment as standard but the tape reel is inside the cabinet. Please advise which arrangement is acceptable, bearing in mind that the former will involve modification to the [ ] at your end.

Yours sincerely,

STATINTL
